These regulations apply to all postgraduate research degrees which are assessed solely or primarily on performance in a single thesis/project report.

This document should be read in conjunction with University’s Degree Regulations and Programmes of Study; the Code of Practice for Supervisors and Research Students; the Guidelines for the Examination of Research Degrees; and the External Examining Code of Practice. These are all available at:
http://www.aaps.ed.ac.uk/regulations/exam.htm

SEPTEMBER 2005

This version applies to work submitted for assessment during the Academic Year 2005/2006.
# SUMMARY OF CONTENTS

## POSTGRADUATE RESEARCH DEGREES

1. **The Examination Process** 3
   - 1.1 Deadlines for the submission of theses 3
   - 1.2 Failure to submit a thesis 4
   - 1.3 Notification of an intention to submit a thesis for examination 4
   - 1.4-1.10 Appointment of examiners 4
   - 1.11-1.12 Submission of a thesis for examination 5
   - 1.13 Transmission of theses to the Examiners 5

2. **Thesis Regulations** 5

3. **Regulatory Standards for the Format and Binding of a Thesis** 6

4. **Degree Specific Examination Requirements** 10
   - 4.1 PhD by Research, PhD by Research Publication 10
   - 4.2 MPhil 12
   - 4.3 Taught Professional Doctorates 13
   - 4.4 MSc by Research, MTh by Research and Master of Research (MRes) 13

5. **Consideration and Approval of Examiner’s Reports** 14
   - 5.1-5.7 The College Postgraduate Studies Committee 14
   - 5.8-5.10 Special Circumstances 15
   - 5.11-5.15 Decisions of College Postgraduate Studies Committees 15
   - 5.16 Degree Transcripts 16

6. **Submission of the Final Version of a Thesis** 17

7. **Posthumous Degrees and Diplomas** 17

8. **Plagiarism and Cheating** 17
   - 8.1-8.2 Suspected plagiarism 17
   - 8.3-8.4 Suspected Cheating 18
   - 8.5-8.13 Procedures 18
   - 8.14 Discipline Committee 20
   - 8.15-8.17 Suspected plagiarism in the work of a graduate 21

9. **Appeals** 21
   - 9.1-9.5 Appeals against decisions; grounds for appeal 21
   - 9.6-9.11 Handling of appeals 22
   - 9.12 Decisions of the Appeal Committee and its sub-committees are final 22
   - 9.13 The Code of Practice 22

10. **Interpretation and Adjudication** 23
    
    **Appendix I** Examination Hall Regulations 24
    
    **Appendix II** The Grounds for the award of specified Research Degrees 25
POSTGRADUATE RESEARCH DEGREES

Any member of staff who requires guidance on examination procedure additional to that given below may consult the University Secretary, the relevant Head of College, College Postgraduate Office or the Academic Affairs, Planning and Secretariat (AAPS) Department.

NOTES:

1) These regulations relate to the following degrees:-
   PhD By Research
   PhD By Research Publications
   PhD for Musical Composition
   PhD in Fine Art (Thesis and exhibit components)
   Taught Professional Doctorates
   MPhil by Research
   MLitt by Research
   MPhil for Musical Composition
   MSc by Research (Thesis only)
   MTh by Research (Thesis only)

2) For specified MSc/MTh by Research programmes which contain a significant proportion of taught courses candidates should refer to the Postgraduate Assessment Regulations for Taught Postgraduate Degrees. In the event of any confusion as to which regulations apply please contact AAPS.

3) In these regulations “the Committee” is the College Postgraduate Studies Committee.

4) The College Postgraduate Studies Committee is responsible for all academic decisions within the College. Together with the internal and external examiners appointed to examine a student for the award of a research degree, it constitutes the body deemed to be the Board of Examiners in this context. The Convener of the Postgraduate Studies Committee is the Convener of the Board of Examiners.

1. THE EXAMINATION PROCESS

   1.1 Deadlines for the submission of theses

   It is the candidate’s responsibility to ascertain the deadline for submission of their thesis. Candidates must submit their theses within 12 months of the completion of their prescribed period of study (excluding any periods of suspension) unless, in exceptional circumstances, an extension is granted by the Committee.

   No candidate may submit a thesis prior to a date two months before the end of the prescribed period of study without the explicit permission of the College Postgraduate Studies Committee.

   For the degree of PhD By Research Publications candidates must submit their thesis between three and twelve months of registration (excluding any periods of suspension) unless, in exceptional circumstances, an extension is granted by the Committee.

   For the degrees of MSc by Research, MTh by Research and Master of Research (MRes) candidates must submit their thesis on or prior to the completion of their prescribed period of study.
1.2 **Failure to Submit a Thesis (PhD by Research, MPhil /MLitt by Research only)**

Students who fail to submit a thesis or, in the case of candidates in Fine Art, a thesis and exhibit or, in the case of candidates in Musical Composition, a portfolio of compositions by the deadline specified in the Regulations will be deemed to have withdrawn and will have their registration recorded as lapsed.

A student whose registration has lapsed in this way will be entitled to ask the committee to reinstate his/her registration at a later date to permit examination of a completed thesis. A decision as to whether or not a candidate should be reinstated will be taken by the Committee, and factors such as the passage of time and its implications for the topic of study will be taken into account. If, exceptionally, reinstatement is approved, the candidate’s thesis will be examined in the normal way, subject to payment of a reinstatement and examination fee.

During the period between lapse of registration as a student and reinstatement, the candidate ceases to be a student and is accordingly not entitled to any supervision or access to University facilities.

1.3 **Notification of an intention to submit a thesis for examination**

All candidates must notify the Committee of their intention to submit their work for examination. This notification must be given on a form obtainable from College Offices and should normally be made at least two months before the thesis is submitted. At the same time, each candidate is required to:

(a) pay any examination fee due;
(b) complete a declaration for use by the University Librarian, relating to access to or use of the thesis which, if approved for the degree, will subsequently be lodged in the Library (see also Regulation 2.5).
(c) lodge six copies of a thesis abstract referred to in Regulation 3.1.14.

**Appointment of Examiners**

1.4 Upon receipt of the Notice of Intention to Submit form, the College Office will contact the Head of the candidate’s School to request that examiners are nominated for the examination of the thesis.

1.5 The College Postgraduate Studies Committee has the formal responsibility for the approval of all examiners.

1.6 Every candidate shall be examined by at least two examiners, one of whom must be an external examiner. In the exceptional circumstance of the second supervisor acting as an internal examiner, a second internal examiner must be appointed. (The preferred alternative in such cases is to consider the appointment of two specialist external examiners and a generalist internal examiner.) Where a member of staff of the University is a candidate there must be two external examiners and one internal examiner. For such candidates, the Head of School shall not be appointed as an examiner without the express permission of the Senatus Postgraduate Studies Committee.

1.7 No person who has held an appointment on the teaching or research staff or has been a student of the University, or who has been granted honorary status in the University, is eligible to act as an External Examiner until a period of three years has elapsed since the termination of the appointment or the status. In exceptional circumstances this rule may be waived by the Senatus Postgraduate Studies Committee.
1.8 Heads of school must ensure that training is made available to inexperienced internal examiners, and that the internal examiner is aware of all his/her duties in the examination process.

1.9 No member of the academic staff of the University, of its Associated Institutions or External Examiner shall be involved in the conduct of any form of assessment, or of any examination in which s/he may reasonably be regarded as having a strong personal interest because of a current or previous relationship to, or close friendship with, a candidate.

If in doubt as to what course professional integrity requires, s/he shall consult the relevant Dean of Postgraduate Studies, who may bring the case to the attention of the Principal, the Head of College or the Senatus Postgraduate Studies Committee.

1.10 Any objection to the nominations submitted by Heads of Schools should be made to the Dean of Postgraduate Studies.

Submission of Thesis for Examination

1.11 At least two bound copies of each thesis containing an abstract must be submitted to the appropriate College Office. In the event that more than two examiners are appointed then additional copies of the thesis will be required. All copies of the thesis shall remain the property of the University.

1.12 All theses must conform to regulations 2-3.

Transmission of theses to the Examiners

1.13 Upon receipt of the copies of the thesis the College Office will transmit the theses and the examination report forms to the examiners.

2. UNIVERSITY OF EDINBURGH THESIS REGULATIONS

2.1 Author’s copyright subsists in the thesis, in the portfolio of musical compositions, in the abstract of the thesis and in the list of compositions. Nevertheless each candidate will be asked to grant the University the right to publish the abstract or list of works, and/or to authorise its publication for any scholarly purpose with proper acknowledgement of authorship.

2.2 Material to be included in a thesis may be published before the thesis is submitted but only with the approval of the supervisor. The thesis must record the fact of such publication.

2.3 Theses must not include work submitted for any other degree or professional qualification unless a clear statement is made as to the precise extent of the work so included.

2.4 The proposed field of a candidate’s study must be approved by the Committee at the time of admission. A thesis title, de novo or amended, must be proposed with the candidate’s notice of intention to submit the thesis for examination. The proposal must be supported by the supervisor.

2.5 Every candidate must incorporate in the thesis a signed declaration (a) that the thesis has been composed by the candidate, and (b) either that the work is the candidate’s own, or, if the candidate has been a member of a research group, that the candidate has made a substantial contribution to the work, such contribution being clearly indicated, and
(c) that the work has not been submitted for any other degree or professional qualification except as specified.

2.6 For the degree of PhD By Research Publications candidates should not submit material published more than ten years prior to the date when they are given permission to register for the degree. The portfolio of published work must be accompanied by an abstract and also by a general critical review of all the submitted work. This critical review should summarise the aims, objectives, methodology, results and conclusions covered by all the work submitted in the portfolio. It should also indicate how the publications form a coherent body of work, what contribution the candidate has made to this work, and how the work contributes significantly to the expansion of knowledge. It should be at least 10,000 words, but not more than 25,000 words in length.

3. REGULATORY STANDARDS FOR THE FORMAT AND BINDING OF A THESIS

3.1 Theses

3.1.1 Size and Thickness of Paper

For both copies either A4 (minimum 70 gsm) or permanent photocopies cut to A4 size

3.1.2 Type or Print

Consistent and clear type of laser print quality should be used for all copies for both text and illustrations.

3.1.3 Layout of Text

4cm binding margin
2cm head margin
2.5cm fore-edge margin
4cm tail margin

The text of the thesis submitted to the examiners should be produced in single-sided copy, on right-facing pages only. The final, published thesis may be produced in single-sided or double-sided copy. In the case of double-sided copy, each chapter must start on a right-facing page. The main text should be in not less than 11\(\frac{1}{2}\) spacing (or 18 points leading). Quotations and notes should be in single spacing.

Pagination must be continuous throughout and include all plans, tables, illustrations etc., which are bound in with the text. Handwritten numbers in indelible ink are acceptable.

3.1.4 Character Size

The size of character used throughout the text, including prefatory material, appendices and displayed matter, should not be less than 2.0 mm for capitals and 1.5 mm for x-height (i.e. the height of lower-case x). Character sizes should be at least 10 points, with body text (text other than headings) not exceeding 12 points.

3.1.5 Character Styles - fonts

Where there is a choice of character style or font, a serif font - eg Times (New Roman) or Palatino - should be used for the main text and a sans serif font - eg Helvetica or Arial - for headings and labelling diagrams, etc.
3.1.6 Word spacing and division

   Text should be set to ensure an even spacing between words for any particular line. Word division at the ends of lines (hyphenation) should be avoided if possible.

3.1.7 Title Page

   Title of thesis.
   Author's name.
   At foot of page:
   name of degree
   The University of Edinburgh
   year of presentation.

   In the case of a thesis which is resubmitted, the year in which the thesis is resubmitted should be shown as the year of presentation

3.1.8 Binding

   Sewn and bound in strong, waterproof black cloth. Not more than 6.5cm thick. If more than 6.5cm thick – two or more volumes.

3.1.9 Lettering on both copies

   In gold on spine only:
   Top: degree
   Middle: name of author (initials and surname)
   Foot: year of graduation.

3.1.10 Diagrams, Maps, Illustrations, etc

   Where possible, to be placed near to the appropriate text
   If placed in pocket, pocket to be attached to inside back cover by the bookbinder.
   If illustrations are contained in a separate volume, binding must correspond to that of the text.
   Photographic illustrations must be permanent reproductions. Good quality colour photocopies of diagrams and photographs may be used rather than the originals.

3.1.11 Published Papers

   It is in the interests of candidates to include any relevant published papers in their thesis. These should either be sewn in by the bookbinder, as an appendix or an electronic copy included on disc or a URL referred to as appropriate. If photocopies of published papers are to be included in the thesis, the publisher's formal permission should be obtained and, where appropriate, the permission of any joint authors. A note that permission has been obtained should be included in the thesis.

3.1.12 Data in Electronic Form

   Candidates may be advised or required to submit data in electronic form for the purposes of assessment. This material is supplementary to the main text and should be submitted in a pocket inside the back cover of the thesis.

3.1.13 Notes, Bibliography and Contents Page

   Notes and the bibliography may be typed in single spacing. A consistent policy should be used, inserting the notes at the foot of the page or at the end of each chapter or at the end of
the thesis. All separate sections, eg bibliography, list of abbreviations, etc, must be identified on Contents page.

3.1.14 Abstracts

Six copies of an abstract must be submitted. The abstract must be no longer than can be accommodated in single-space type on one side only of a single form obtainable from the College Office. Abstracts should conform to Regulations 3.1.2–3.1.6. In addition, the text of the abstract should be incorporated at the beginning of each copy of the thesis. Candidates are reminded of the contents of Regulation 2.5.

3.2 Portfolios of Musical Compositions

3.2.1 Paper, Style and Media

Compositions in traditional stave notation should be either processed using computer software or written by hand on printed music manuscript paper. Copies should be suitable for photographic reproduction. Scores larger than A3 size should normally be reduced. Smaller scores should not be reduced. An electronic tape submission should normally consist of a digital or analogue master tape, along with a graphic sound-diffusion score for each separate work.

3.2.2 Manuscript or Print

Manuscripts should be clearly and consistently written and be suitable for photographic reproduction. Computer copies should be printed by laser printer.

3.2.3 Title Pages

Each main item should begin with a standard title page, as shown below. Smaller items should be bound together, each group of items beginning with a standard title page as follows:

Title of composition.
Composer’s name.
Name of degree for which submitted, with year of presentation.

If more than two items are submitted, all items should be enclosed within a box or boxes. Each major item or box should be labelled as follows:

Composer’s name
List of compositions enclosed
At foot of label:
Submitted in satisfaction (or in part satisfaction) of the requirements for the degree of PhD (or MPhil) in the University of Edinburgh

Year of presentation.
In the case of a portfolio which is resubmitted, the year in which the portfolio is resubmitted should be shown as the year of presentation.

3.2.4 Labelling of Tapes

In the case of electronic compositions, each item should be clearly labelled as follows:

Title of composition
Composer’s name
Format (mono, 2- or 4-track)
Tape speed*
3.2.5 Binding

Each composition or group of compositions, other than electronic compositions, should be either sewn and bound in strong, waterproof black cloth or (in the case of shorter items) plastic-comb bound, with semi-stiff covers. The binding of A3 scores should extend the whole length of the spine. The box or boxes containing the scores should be strongly made and provided with cloth spine(s).

3.2.6 Lettering on both copies

In gold on spine of box or boxes:

Top: degree
Middle: name of composer (initials and surname)
Foot: year of graduation

3.2.7 Published Compositions

Published compositions, if bound, may be submitted in their original binding, and fitted into the box. Unbound published material should be bound in the usual way, either separately or together with unpublished items. If published compositions are to be included in the portfolio, the publisher’s formal permission should be obtained and, where appropriate, the permission of other interested persons. A note that permission has been obtained should be included in the copy of the published work.

3.2.8 List and Descriptions

Three copies of a list of items must be submitted with a brief factual description of each item. The list and descriptions must be no longer, in all, than can be accommodated in single-space type on one side only of a single form obtainable from the College Office. Candidates are reminded of the contents of Regulation 2.5.

3.3 Thesis and Exhibit for PhD in Fine Art

The thesis will conform to regulations 3.1.1 to 3.1.14. Final copies lodged in the Library will contain a permanent record of the exhibit, attached to the thesis, which may be in the form of photographs, CD ROM or other recorded media.

3.4 Temporary Binding

Theses and portfolios of compositions may be submitted for examination in a temporary binding. Theses may be either soft bound with glued spine, spirally bound or comb bound with black rear cover, clear PVC front cover leaving title page visible; if necessary bound in more than one volume. The instructions for diagrams, maps, illustrations, etc, are the same as in Section 3.1.10. Where a more substantial binding is advisable, theses should be bound in black, covered solid and with end pages; the spine being rough-cut and glued. In the latter case the spine should be labelled, giving the name of the author and the abbreviation of the degree (PhD, MPhil, EdD, EngD in SLI, DClinPsychol etc) for which the thesis is being submitted.
4. DEGREE SPECIFIC EXAMINATION REQUIREMENTS

4.1. PhD by Research

4.1.1 The examiners will hold an oral examination unless this is, for exceptional and special reasons, waived by the Committee.

4.1.2 Candidates may be allowed to sit the oral examination away from Edinburgh with the written approval of the College Postgraduate Studies Committee.

In exceptional cases, and with the approval of the examiners, the candidate and relevant College Postgraduate Studies Committee, it may be possible for the oral examination to take place via videoconferencing. For further details please see the following:– http://www.aaps.ed.ac.uk/Committees/SPGSC/videolink.htm

4.1.3 The oral examination must be conducted jointly by an External Examiner and one or more internal examiners.

4.1.4 The Internal Examiner is responsible for co-ordinating arrangements for the oral examination and ensuring that all examiners are aware of their responsibilities and of the grounds for the award of the relevant degree.

4.1.5 The Examination Hall regulations are in Appendix I and are a formal part of these regulations.

4.1.6 If required, specific reasonable adjustments will be made to enable disabled students to sit examinations, including any written, practice or oral examination, continuously assessed coursework or dissertation which counts towards the final assessment. Approval of specific reasonable adjustments should follow the normal approval routes. Arrangements for degree examinations must be approved in advance by the Registry (650 2214), and the Disability Office (650 6828) for dyslexic students, and reported to the examiners. The Registry requires to have notification of specific examination arrangements for dyslexic students well in advance of examination weeks and specific deadlines apply (see http://www.disability-office.ed.ac.uk/specificlearningdifficulties/examination_arrangements.shtml). For all other disabled students the Registry must see and accept a medical certificate or similar documentation relating to the candidate or be satisfied that an acceptable certificate will be produced. Such candidates should discuss their requirements with their Programme Director and/or the Disability Office at the earliest opportunity.

4.1.7 The examiners report to the Committee, which in the light of their report makes a recommendation to the Senatus on the award of the degree. The report includes initial written reports on their assessment of the thesis from each of the examiners, which should, wherever possible, be completed without consultation among the examiners. If the examiners do find it necessary to consult at this stage, this fact and the reason(s) for it should be noted in their reports. These initial reports are followed, after the oral examination (unless this is exceptionally waived by the committee), by a written, final recommendation in accordance with Regulation 4.1.8.

4.1.8 The examiners must report to the Committee either a joint recommendation or, if they are unable to reach agreement, separate recommendations, in one of the following forms:

(a) that the candidate satisfies the requirements for the award of the degree of PhD as laid down in the University’s Degree Regulations and Programmes of Study (See Appendix II) as appropriate and the degree ought accordingly to be awarded; or
(b) that the candidate satisfies the requirements for the award of the degree except that minor editorial corrections must be made to the thesis, and that the degree ought accordingly to be awarded subject to certification by the internal examiner(s), and by the external examiner where the examiner so requests, that the corrections have been satisfactorily made. NB The candidate should make the corrections within one month; or

c) that the candidate satisfies the requirements for the award of the degree except for stated deficiencies in the thesis which, in the opinion of the examiners, the candidate will be able to remedy without further supervision and without undertaking any further original research; the modifications are to be completed within a specified period, generally not exceeding three months, and to be subject to certification by the internal examiner(s), and by the external examiner, where the examiner so requests, before the degree is awarded; or

d) that the thesis satisfies the requirements for the degree, or satisfies the requirements except for stated deficiencies, but the candidate’s oral defence of the thesis has been deficient in specified respects; the candidate should be required to undergo further examination, written, oral or practical, and awarded the degree only upon achieving a satisfactory standard in such further examination and upon certification by the internal examiner(s), and by the external examiner where the examiner so requests, that any specified minor modifications to the thesis have been satisfactorily made; or

e) that the candidate is substantially deficient in one or more of the requirements for the degree, but appears capable of so revising the thesis as to satisfy them, and ought therefore to be invited to resubmit the thesis in a substantially revised form along lines indicated by the examiners within a further period of study which shall not exceed 24 months; or

f) that the candidate is substantially deficient in one or more of the requirements for the degree and appears not capable of so revising the thesis as to satisfy them; but the thesis satisfies the requirements for the degree of MPhil or MLitt except for stated deficiencies in the thesis, and one of these degrees ought accordingly to be awarded subject to certification by the internal examiner(s), and by the external examiner where the examiner so requests, that specified minor modifications have been satisfactorily made and the necessary changes made to the thesis binding and title page; or

g) that the candidate is substantially deficient in one or more of the requirements for the degree and appears not capable of so revising the thesis as to satisfy them; but the thesis is suitable for revision in stated ways so as to meet the requirements for the degree of MPhil or MLitt, the candidate appears capable of making the appropriate revisions, and ought therefore to be invited to resubmit the thesis for one of these degrees in an appropriately revised form within a further period of study which shall not exceed 24 months; or

h) that the thesis and/or the candidate’s defence of it in oral examination are so fundamentally deficient in respect of all or any of the requirements for the degree that the candidate ought neither to be awarded the degree of PhD nor a taught professional doctorate, nor to be invited to resubmit the thesis for any degree of the University.

4.1.9 The provisions of Regulation 4.1.8 (e) can be applied only once.

4.1.10 A candidate presenting a thesis under Regulation 4.1.8 (g) may not subsequently be permitted to resubmit the thesis under Regulation 4.2.3 (e).

4.1.11 The Committee, on receipt of an agreed recommendation by the examiners, must consider whether it appears to be adequately justified in the light of the full reports by the examiners, and may make further inquiry of the examiners and the candidate’s supervisor(s) in case of any apparent inadequacy. The Committee must then either confirm the examiners’ recommendation and transmit it to the Senatus without further comment or for stated reasons make a different recommendation to the Senatus, including, where appropriate, the examination of the thesis de novo by different examiners.
4.1.12 The Committee, on receipt of a report by the examiners indicating disagreement as to the appropriate recommendation, may, after such inquiry as it sees fit to make, recommend to Senatus that the recommendation of one of the examiners be accepted in preference to that of the other; but unless clear grounds can be shown for such a course of action, the Committee ought normally to recommend either that a further report on the thesis be obtained from some other examiner or examiners before any decision is made as to awarding or withholding the degree, or that the examination of the thesis be conducted de novo by different examiners.

4.1.13 A candidate who has decided to accept the Committee’s invitation to resubmit the thesis under Regulation 4.1.8 (e) or (g) must give the Committee one month’s notice of his/her intention to do so on the prescribed form. The candidate must lodge the thesis for examination before the expiry of the further period of study determined by the Committee, unless an extension of time is granted on formal application to the Committee. The appropriate fee will be charged.

4.1.14 Candidates are not permitted to resit final written examinations, save that a candidate who fails to complete a final written examination, and who can produce satisfactory evidence that the failure was due to reasons beyond the candidate’s control, may be deemed by the Committee to have satisfied the requirements for the degree or be permitted to resit the examination.

4.1.15 For the degree of PhD by Research Publications the following regulations will apply: Regulations 4.1.1 – 4.1.7, 4.1.8 (a), (b), (c) and (h) (ONLY), 4.1.11 – 4.1.12 and 4.1.14.

4.2 MPhil

4.2.1 An oral examination will normally be required.

Regulations 4.1.2 – 4.1.6 will apply.

4.2.2 Notwithstanding Regulation 4.2.1 an oral examination will be required for all borderline candidates and in instances where there is significant disagreement between the examiners.

4.2.3 The examiners of the thesis must report to the Committee either a joint recommendation or, if they are unable to reach agreement, separate recommendations, in one of the following forms:

(a) that the candidate satisfies the requirements for the award of the degree of MPhil or MLitt in respect of the thesis and the oral examination as laid down in the University’s Degree Regulations and Programmes of Study (See Appendix II) as appropriate and that the degree ought accordingly to be awarded; or

(b) that the candidate satisfies the requirements for the award of the degree except that minor editorial corrections must be made to the thesis, and that the degree ought accordingly to be awarded subject to certification by the internal examiner(s), and by the external examiner where the examiner so requests, that the corrections have been satisfactorily made NB The candidate should make the corrections within one month; or

(c) that the candidate satisfies the requirements for the degree except for stated deficiencies in the thesis which, in the opinion of the examiners, the candidate will be able to remedy without supervision and without undertaking any further original research; the modifications are to be completed within a specified period, generally not exceeding three months, and to be subject to certification by the internal examiner(s), and by the external examiner, where the examiner so requests, before the degree is awarded; or

(d) that the thesis satisfies the requirements for the degree, or satisfies the requirements except for stated minor deficiencies, but the candidate’s oral defence of the thesis has been deficient in specified respects; the candidate should be required to undergo further examination, written, oral or practical, and awarded the degree only upon achieving a
satisfactory standard in such further examination and upon certification by the internal examiner(s), and by the external examiner where the examiner so requests, that any specified minor modifications to the thesis have been satisfactorily made; or (e) that the candidate is substantially deficient in one or more of the requirements for the degree, but appears capable of so revising the thesis as to satisfy them, and ought therefore to be invited to resubmit the thesis in a substantially revised form along lines indicated by the examiners within a further period of study which shall not exceed 24 months; or (f) that the thesis and/or the candidate’s defence of it in oral examination are so fundamentally deficient in respect of all or any of the requirements for the degree that the candidate ought not to be awarded the degree of MPhil.

4.2.4 The provisions of Regulations 4.2.3 (e) can be applied only once.

4.2.5 The Committee, on receipt of an agreed recommendation by the examiners, must consider whether it appears to be adequately justified in the light of the full reports by the examiners, and may make further inquiry of the examiners and the candidate’s supervisor(s) in case of any apparent inadequacy. The Committee must then either confirm the examiners’ recommendation and transmit it to the Senatus without further comment or for stated reasons make a different recommendation to the Senatus, including, where appropriate, the examination of the thesis de novo by different examiners.

4.2.6 The Committee, on receipt of a report by the examiners indicating disagreement as to the appropriate recommendation, may, after such inquiry as it sees fit to make, recommend to Senatus that the recommendation of one of the examiners be accepted in preference to that of the other; but unless clear grounds can be shown for such a course of action, the Committee ought normally to recommend either that a further report on the thesis be obtained from some other examiner or examiners before any decision is made as to awarding or withholding the degree, or that the examination of the thesis be conducted de novo by different examiners.

4.2.7 A candidate who has decided to accept the Committee’s invitation to resubmit the thesis under Regulation 4.2.3 (e) must give the Committee one month’s notice of his/her intention to do so on the prescribed form. The candidate must lodge the thesis for examination before the expiry of the further period of study determined by the Committee, unless an extension of time is granted on formal application to the Committee. The appropriate fee will be charged.

4.2.8 Candidates are not permitted to resit final written examinations, save that a candidate who fails to complete a final written examination, and who can produce satisfactory evidence that the failure was due to reasons beyond the candidate’s control, may be deemed by the Committee to have satisfied the requirements for the degree or be permitted to resit the examination.

4.3 Taught Professional Doctorates

4.3.1 Regulation 4.1.1 – 4.1.14 will apply.

4.3.2 The oral examination will be based primarily on the thesis but may cover any part of the programme.

4.4 MSc by Research, MTh by Research and Master of Research (MRes)

4.4.1 An oral or practical examination may be required. If an oral examination is required then regulations 4.1.2 – 4.1.6 will apply.
4.4.2 Notwithstanding Regulation 4.4.1 (above) an oral or practical examination will be required for all borderline candidates and in instances where there is significant disagreement between the examiners.

4.4.3 The examiners must report to the Committee separate recommendations on the prescribed form.

4.4.4 The University Postgraduate Common Marking Scheme below is to be used.

* A mark of 47 – 49 may be used to denote the possibility that by minor revision the work may be upgraded to masters standard

** A mark of 37 – 39 may be used to denote the possibility that by minor revision the work may be upgraded to diploma standard

*** In those programmes where a diploma may be awarded for the taught component only, a failed dissertation may be put aside and the diploma awarded.

The time allowed for revision is not more than ten working days.

4.4.5 Major revisions of the dissertation with re-submission are not allowable in the case of masters programmes unless a special case has been submitted to, and agreed by, the relevant College Postgraduate Studies Committee.

4.4.6 Colleges and Schools are free to amplify, but not to alter, the overall description of grades (Column 3) for the further guidance of their candidates, where this is thought to be helpful.

4.4.7 The masters degree may be awarded with distinction. To achieve a distinction, a candidate must have been awarded at least 70% on the University’s Postgraduate Common Marking Scheme for the dissertation and must also have been awarded a mark for the coursework element that is also at least, or very close to, the 70% standard.

5. CONSIDERATION AND APPROVAL OF EXAMINER’S REPORTS

The College Postgraduate Studies Committee
5.1 Following transmission of examiner’s reports to the College Office the College Postgraduate Studies Committee will convene to discuss the reports and to decide whether or not to approve the recommendations made by the examiners.

5.2 Prior to the meeting of the College Postgraduate Studies Committee, examiner’s recommendations are inherently provisional and have no status until they are approved or modified by the Committee. If information on such recommendations are released before confirmation by the Committee, students must be advised that the recommendations are provisional and may be modified when considered at the Board of Examiners meeting in that year.

5.3 The Examiners for individual candidates will not attend the relevant meeting of the College Postgraduate Studies Committee.

5.4 The Secretary to the College Postgraduate Studies Committee is responsible for giving reasonable notice of meetings, ensuring that the recommendations of the Committee are approved in writing and made available to Registry at the required time, and ensuring that a standard report of the meeting is produced. The report is a confidential document, although information on a particular candidate may need to be disclosed to that candidate under the Data Protection Act and generic information may need to be disclosed under Freedom of Information.

5.5 In the event of any modification to the recommendation for a specific candidate a minute of the College Postgraduate Studies Committee’s meeting should be agreed and lodged with the College Office. The minute should record the names of the persons attending the meeting, relevant individual circumstances raised at the meeting or considered by a Special Circumstances Committee and the outcome of subsequent discussion, and the discussion and outcomes for the candidates. Details of any modification to the recommendation should be recorded together with the reasons for these.

5.6 Provided reasonable notice of a meeting has been given, a meeting is properly constituted and empowered to act if no fewer than three members (including the Convenor and Secretary) are present.

5.7 The Convener of the Committee may, at his or her discretion, invite any person who has been involved in the assessment of the work under consideration by the Committee to be present ‘in attendance’ (without voting rights).

Special Circumstances

5.8 Any personal circumstances for which there is sufficient documentary evidence, and where these circumstances may have adversely affected a candidate’s performance in an assessment, should be reported to the Secretary to the College Postgraduate Studies Committee. Responsibility for producing the documentary evidence rests with the candidate. The Supervisor can pass evidence in confidence to the Convener of the College Postgraduate Studies Committee. Where such information has to be presented, it should be in as concise a form as is consistent with clarity.

5.9 The Committee will consider, with particular care, all contentious cases and all cases near to a borderline. After recording the deliberations of any special circumstances the Committee will present its final decisions with regard to the specific degree award. The influence of the evidence of any special circumstances, with reasons, will be fully minuted.

5.10 It is not within the power of a College Postgraduate Studies Committee to recommend the award of any degree or diploma without substantial evidence of attainment to at least the lowest level required for the award of that qualification.
Decisions of College Postgraduate Studies Committees

5.11 Decisions by a College Postgraduate Studies Committee, once certified in writing, are final except in cases of:

(a) A College Postgraduate Studies Committee, at the insistence of any of its members, review a decision if information relevant to that decision, but unavailable at the time the decision was made, comes to light or if any error having a material bearing on that decision or an error in the written certification of that decision has been made; if the Committee is satisfied that there are grounds for varying the decision the Committee shall forthwith report its recommendation to that effect to the University Secretary, who may either report the recommendation to the Senatus or exceptionally refer it to the Senatus Postgraduate Studies Committee for decision.

(b) Where an error is discovered in the assessment of any examination or in the recording or notification of the result of any examination of any degree or in any process connected with any of these matters, the University shall forthwith correct that error and amend its records to show the correct result and that whether or not the result has been published or otherwise notified to the candidate. The University shall notify the candidate of the corrected result as soon as practicable and shall also correct any reference or statement which may have been provided by the University whether to the candidate or to a third party. Having been notified of the corrected result the candidate shall return to the University any documentation which may have been issued to the candidate notifying the original result which has been corrected. The candidate shall have no claim against the University for any loss or damage which may have been incurred by the candidate as a result of any error which may have been made.

(c) A candidate has the right of appeal provided by Section 9 below.

(d) Any member of Senatus may request Senatus to refer for investigation any matter concerning examinations.

(e) In proved cases of substantial and significant copying, plagiarism or other fraud, the Senatus has the power to reduce the classification of, or to revoke, any degree it has already awarded, and to require the degree, diploma or certificate scroll to be returned. (See section 8.)

5.12 The decisions of the Committee must be notified to the Registry on the prescribed report form. Degree results should reach the Registry as soon as possible and certainly no later than 21 days before the date of graduation.

5.13 Notification of final results and the award of qualification to candidates, following the meeting of the Committee, is the responsibility of the College Postgraduate Office.

5.14 All discussion at a College Postgraduate Studies Committee meeting is confidential, and no comments or remarks should be reported to any candidates, whether or not they are unattributed. Under normal circumstances the views of a particular examiner should not be made known to a candidate. However, if a candidate makes a request under the Data Protection Act, information recorded in the minutes on that particular candidate may need to be disclosed.

5.15 Candidates are entitled to receive any comments made by the Internal and External Examiners where approval has been given by the examiners to release this information. Such information will be made available automatically to the candidate by the College Postgraduate Office via the normal procedures.

Degree Transcripts
5.16 Because of the nature of research degrees, transcripts for such degrees are not issued by the University. Colleges may instead provide candidates with an explanation of the specific degree awarded and confirmation that the candidate has been awarded (or is eligible to be awarded) this degree.

6. SUBMISSION OF THE FINAL VERSION OF A THESIS

6.1 Following approval of the examination outcome by the College Postgraduate Studies Committee, the candidate will be provided with information on the changes or modifications to the thesis which are required by the examiners. These changes or modifications must be made within the timescale identified to the candidate by the Committee.

6.2 The internal examiner(s), and the external examiner, where the examiner so requests, shall then provide certification to the Committee that any corrections or modifications required by the examiners have been satisfactorily made.

6.3 Following receipt of certification that the thesis has been amended to the satisfaction of the examiners the Committee will be asked to approve the appropriate award of degree.

6.4 After the examination is completed and the award of degree has been approved the author of the thesis or portfolio is responsible for ensuring that the ‘final’ version of the thesis is submitted to the University. A candidate cannot graduate until they have formally submitted the final version of their thesis to the University. Final submission can either be in hard copy (two copies, in a permanent binding which conforms to the regulations in sections 2-3) to the College Office or in electronic copy via submission to the electronic Edinburgh Research Archive.

7. POSTHUMOUS DEGREES AND DIPLOMAS

7.1 The Senatus may authorise the conferment of posthumous degrees. Each such conferment requires a positive proposal from the relevant College Postgraduate Studies Committee and the Senatus Postgraduate Studies Committee, followed by consideration by the University Secretary. Normally a posthumous degree is conferred only where the candidate was qualified to receive the degree at the time of death.

8. PLAGIARISM AND CHEATING

Notes:

1) These regulations should be read in conjunction with the appropriate guidance documentation which is available via:-

http://www.aaps.ed.ac.uk/regulations/Plagiarism/Intro.htm

2) Very minor cases of plagiarism that can essentially be viewed as inadequate scholarship (e.g inadequate citation of a paper or a picture) should be handled as a correction rather than require the invocation of the formal plagiarism procedures. Please refer to the guidance documentation for further information.

Suspected plagiarism

8.1 Plagiarism is the act of copying or including in one’s own work, without adequate acknowledgement, intentionally or unintentionally, the work of another. It is academically fraudulent and an offence against University discipline. Plagiarism, at
whatever stage of a student’s course, whether discovered before or after graduation, will be investigated and dealt with appropriately by the University.

8.2 All work submitted for assessment by students is accepted on the understanding that it is the student’s own effort without falsification of any kind. Students are expected to offer their own analysis and presentation of information gleaned from research, even when group exercises are carried out. In so far as students rely on sources, they should indicate what these are according to the appropriate convention in their discipline. The innocent misuse or citation of material without formal and proper acknowledgement can constitute plagiarism, even when there is no deliberate intent to cheat. Work may be plagiarised if it consists of close paraphrase or unacknowledged summary of a source, as well as word-for-word transcription. In addition, students are required to acknowledge all help and other assistance that they have received. This should be done both in the formal list of acknowledgements in the thesis and at the appropriate places in the thesis. Examples of such help might include provision of material, assistance with statistics or data processing, and external collaborations. Any failure adequately to acknowledge or properly reference other sources in submitted work and to properly acknowledge help and assistance received could lead to the award of a lower degree and to disciplinary action being taken.

Suspected cheating

8.3 It is academically fraudulent and an offence against University discipline for a student to invent or falsify data, evidence, references, experimental results or other material contributing to any student’s assessed work or for a student knowingly to make use of such material.

8.4 It is an offence for any student knowingly to make use of unfair means in any University assessment, to assist a student to make use of such unfair means, to do anything prejudicial to the good conduct of the assessment, or to impersonate another student or allow another student to impersonate him/her in an examination. Any student found to have cheated or attempted to cheat in an assessment, may be deemed to have failed that assessment and disciplinary action may be taken.

Procedures

8.5 If an internal or external examiner suspects that a thesis contains evidence of plagiarism or cheating, he or she will inform the Convener of the Relevant Board of Examiners (i.e. for research degrees, the Convener of the College Postgraduate Studies Committee). Evidence of the suspected plagiarism or cheating should be collected together by the internal examiner, and a report made to the Convener of the College Postgraduate Studies Committee. See also Note 2 (above).

8.6 On the basis of the internal examiner’s report, the Convener of the College Postgraduate Studies Committee will decide whether the plagiarism or cheating is minor or significant. The Convener of the College Postgraduate Studies Committee may seek advice from the internal and external examiner and the College Academic Misconduct Officer in taking this decision.

(a) If the plagiarism or cheating is minor, the oral examination will be allowed to take place as planned and the Convener of the College Postgraduate Studies Committee will advise the examiners to take the minor plagiarism or cheating into account in determining the academic quality of the work.

(b) If the plagiarism or cheating is significant the oral examination will not be allowed to take place, and the report will be referred to a nominated College Academic Misconduct Officer for further investigation. (Regulations 8.8 to 8.12)
If plagiarism or cheating is suspected during an oral examination, the examiners present must decide whether the evidence suggests a minor or significant case of plagiarism or cheating (not withstanding the requirements of 8.5 above). This decision must be taken in the absence of the student (and the supervisor, if present), who should be asked to leave the room whilst the discussion takes place. The examiners should then take one of the following courses of action (in the event of any disagreement between the internal and external examiner, the external examiner’s views will normally take precedence):

(a) If the evidence is of minor plagiarism or cheating, the oral examination should continue and the examiners should make a face value recommendation about the award of the degree. It is important that the oral examination should proceed in as normal a way as possible so that, if the charges of plagiarism or cheating are set aside, the student has an examination result which is given under the same conditions as for other candidates for the same degree. The internal examiner should prepare a report for the Convener of the College Postgraduate Studies Committee as outlined in 8.5 above, and should include the face value recommendation about the award of the degree in this report. The Convener of the College Postgraduate Studies Committee will then make a decision about the significance of the case as outlined in 8.6 above. If the plagiarism or cheating is considered to be minor then the case will follow the procedure for 8.6 a) as closely as possible and the Convener of the College Postgraduate Studies Committee will liaise with the examiners to confirm the basis of the face value recommendation and the way in which the minor plagiarism or cheating has been taken into account in determining the academic quality of the work. If the plagiarism or cheating is considered to be significant, then the Convener of the College Postgraduate Studies Committee will refer the report to the nominated College Academic Misconduct Officer for further investigation (Regulations 8.8 to 8.12).

(b) If the evidence is of significant plagiarism that is too blatant and extensive to allow the examination to continue, then the oral examination should be suspended. The internal examiner should prepare a report for the Convener of the College Postgraduate Studies Committee, as outlined in 8.5 above. The Convener of the College Postgraduate Studies Committee will then make a decision about the significance of the case as outlined in 8.6 above, and will refer the case to a nominated College Academic Misconduct Officer for further investigation as necessary (Regulations 8.8 to 8.12).

In cases of 8.6 b) or significant cases as outlined in 8.7, the Convener of the College Postgraduate Studies Committee and the College Academic Misconduct Officer, (who should not normally be the representative from the student’s School), will interview the student to obtain information about the suspected plagiarism or the suspected cheating, and any special circumstances. The student will receive a written invitation to the interview, which should give a reasonable amount of notice, and will be sent a copy of the report prepared for the Convener of the College Postgraduate Studies Committee and referred to the College Academic Misconduct Officer (8.5 – 8.7 above). The student must be given the opportunity to be accompanied at the meeting by another member of the University community, eg a Students’ Association adviser.

The purpose of the interview is to obtain information about the case in order to consider a way forward. The College Academic Misconduct Officer may seek advice from the secretary of the Discipline Committee (650 2140) prior to the interview.

The student will be sent a copy of the report that the College Academic Misconduct Officer draws up following the interview so that she/he can comment on matters of fact in the report. The report should include the evidence of the suspected plagiarism or cheating; the report of the interview with the student; where appropriate, information given to students on the programme about the avoidance of plagiarism; and any further information that the student wishes to be taken into account. It should not include the action recommended by the College Academic Misconduct Officer.
8.11 The College Academic Misconduct Officer will decide whether the case should be referred back immediately to the Board of Examiners (ie for research degrees the College Postgraduate Studies Committee), or should be handled as a disciplinary case.

(a) If the case is to be referred back to the College Postgraduate Studies Committee, the College Academic Misconduct Officer, in consultation with the Convener of the College Postgraduate Studies Committee, will determine the appropriate level of penalty, if any, to be imposed (see Regulation 8.13).

(b) If the case is considered so serious that it constitutes a disciplinary matter, the College Academic Misconduct Officer will make a report in preparation for a disciplinary interview. The interview will be conducted by a College Authorised Officer, who will not be the same person as the College Academic Misconduct Officer who investigated the case. The student will be notified about the arrangements for the interview under the Code of Student Discipline, and informed that the outcome could include referral to the Discipline Committee.

8.12 If there is a lengthy period, e.g. more than a month, between the investigation of the case and the next scheduled Board of Examiners’ meeting (ie for research degrees, the next meeting of the College Postgraduate Studies Committee), then the Convener should convene an interim Board.

8.13 In a case covered by the terms of 8.11 (a) above, the Board of Examiners (ie for research degrees, the College Postgraduate Studies Committee) has the power to apply the following penalties:

(a) Require that the thesis be resubmitted with the inappropriate material removed and sufficient editing done to make the thesis comprehensible. In this case, the Board of Examiners will inform the student of the time allowed for the resubmission. (This penalty may also include the consequence that the resubmitted thesis is no longer sufficiently substantial for the original degree and can only be submitted for a lesser degree).

(b) Require that the thesis be re-examined with the material in question excluded from consideration with whatever consequences would normally follow from such performance, including failure or award of a lesser degree.

(c) Fail the thesis.

The Board of Examiners must apply the penalty imposed by the College Academic Misconduct Officer and must not apply any additional penalty. In the exceptional circumstance of the Board of Examiners disputing the penalty set out by the College Academic Misconduct Officer, the case should be referred to the Head of College for adjudication. The Board of Examiners has power to apply a penalty only in respect of the specific items of work submitted for assessment which have been the subject of the College Academic Misconduct Officer’s report and in which plagiarism or cheating has been detected.

**Discipline Committee**

8.14 If the case is referred to the Discipline Committee, the student has the right to appear before the Committee and to present evidence. In cases of plagiarism, the Discipline Committee, without prejudice to any other powers it may have under the Code of Discipline, has power to:

(a) award a fail, or
(b) temporarily suspend the student from the University, or
(c) expel the student from the University.
In reaching its decision on the appropriate penalty, the Discipline Committee is entitled to consult the Convener(s) of the Board(s) of Examiners and the College Academic Misconduct Officer.

**Suspected plagiarism or cheating in the work of a graduate**

8.15 If plagiarism or cheating is found to have occurred in the work of a graduate the Senatus has the authority to reduce the classification of a degree conferred, or to revoke a degree, diploma or certificate and to require the graduate to return the degree scroll or certificate.

8.16 If it comes to the University’s notice that the work of a graduate, which has already been assessed for the award of a degree or diploma, may contain plagiarism or have been based on cheating, and that the nature and extent of the plagiarism or cheating may have been material to the award of the degree, the case will be investigated by the College Academic Misconduct Officer, following procedures as close as possible to those in sections 8.5 to 8.10 above.

8.17 The College Academic Misconduct Officer will report to the Appeal Committee. The graduate will have the right to see the report and to submit evidence in writing in defence or in mitigation to the Appeal Committee and will be invited to attend a hearing. If the case is proved, the Board of Examiners, constituted to reflect as closely as possible the composition of the Board responsible for the award, will then be instructed by the Appeal Committee to review the assessment of the graduate’s qualification. The Board will make a recommendation to the University Secretary that the degree conferred should be confirmed or reduced or that the degree or diploma should be revoked. The University Secretary will either report the recommendation to the Senatus or exceptionally refer it to the Appeal Committee for further advice and re-referral to the Board of Examiners.

**9. APPEALS**

9.1 For the purpose of this section, “examination” is understood to include any written, practical or oral examination, continuously assessed coursework or dissertation which counts towards the final assessment.

9.2 The College Postgraduate Studies Committee is responsible for all academic decisions within the College. Together with the internal and external examiners appointed to examine a student for the award of a research degree, it constitutes the body deemed to be the Board of Examiners in this context. The Convener of the Postgraduate Studies Committee is the Convener of the Board of Examiners.

9.3 Factors which may adversely affect a candidate’s performance in an examination or in assessed coursework over the year, such as personal illness or the illness of a close relative or partner or supervision or provision of adequate resource, must be drawn to the attention of the Examiners in writing by the candidate as soon as possible and, in any event, before the meeting of the Board of Examiners.

9.4 A candidate may appeal against an examination result on the grounds of:

   (a) substantial information directly relevant to the quality of performance in the examination which for good reason was not available to the examiners when their decision was taken. Ignorance of the requirement mentioned in paragraph 9.3 above to report timeously factors which may have adversely affected a candidate's performance, or failure to report such factors on the basis that the candidate did not anticipate an unsatisfactory result in the examination, can never by themselves constitute good reason; and/or
(b) alleged irregular procedures or improper conduct of an examination. For this purpose “conduct of an examination” includes conduct of a meeting of the Board of Examiners; and/or
(c) evidence of prejudice or lack of due diligence in the examination on the part of any examiners.

9.5 Appellants must specify the formal ground or grounds under which they believe their appeal should be considered. They must also specify the basis or bases on which the formal grounds are invoked.

9.6 Any appeal must be submitted in writing to the University Secretary as soon as possible. Only in special circumstances may an appeal be considered more than six weeks after the results of an examination have been available to the appellant. The decision as to whether or not special circumstances exist will be made by the sub-committee referred to in Regulation 9.7.

9.7 The University Secretary or his or her nominee and two members of the Appeal Committee (who must not be from the same School as the appellant or any of his/her supervisory team) are empowered as a sub-committee to decide whether or not a prima facie case of appeal is established to be heard by the full Appeal Committee on behalf of the Senatus.

9.8 The written presentation of the case, which the appellant is required to submit prior to the prima facie hearing, should contain all the relevant arguments on the basis of which the appeal is being made. Other than in exceptional circumstances and with the approval of the Convener, the appellant will not at any point thereafter be permitted to introduce new circumstances into the appeal. The appellant has the opportunity to comment in their presentation on information provided on behalf of the Board of Examiners. The final written presentation must be submitted three weeks after receipt of this information by the appellant.

9.9 The sub-committee may make one of three determinations; it may decide that there is no prima facie case for consideration by the Committee, in which case the proceedings will be concluded; it may refer the case for Convener’s Action (See 9.10); or it may decide that there is a prima facie case for consideration by the Committee.

9.10 If the appeal is considered by Convener’s Action, then it is dealt with by the Convener, Appeal Committee secretary and one other academic member of the Appeal Committee, who was not a member of the sub-committee. On considering an appeal by Convener’s Action, the Convener has the power to require the Board of Examiners to reconvene to reconsider the appellant’s results or to refer the case to the full Appeal Committee.

9.11 If the appeal is heard by the Appeal Committee the appellant will be given reasonable notice of the date of the hearing and will be entitled to attend and to be accompanied by one other member of the University of Edinburgh community. The appellant may present his or her case in person or may nominate another member of the University of Edinburgh community to do so on his/her behalf. The Appeal Committee quorum is the Convener and secretary plus three academic staff drawn from the list of eligible nominees. On hearing an appeal, the Committee has the power to vary the original decision of the Board of Examiners, to confirm it, to require the Board of Examiners to reconvene to reconsider the appellant’s results, adopting any requirements specified by the Appeal Committee, or to require that new examiners be appointed to re-examine the candidate.

9.12 The decision of the Appeal Committee and any decision of the sub-committee that no prima facie case has been established (see 9.7) are final and only in exceptional circumstances may an appellant appeal the decision on any grounds. The decision as to
whether or not exceptional circumstances exist will be made by the sub-committee referred to in Regulation 9.7.

9.13 In any appeal, a student will be deemed to have read these regulations and the Code of Practice for Supervisors and Research Students which is distributed to all students on acceptance or registration. The advice set out in the Code of Practice may be taken into account by the Committee when considering an appeal, but the compliance or otherwise of any party with such advice shall not necessarily be treated as decisive in determining the appeal.

10. INTERPRETATION AND ADJUDICATION

Any dispute arising from these Regulations, whether of interpretation or otherwise, is determined by the Senatus Postgraduate Studies Committee subject to review by the Senatus.
Appendix I
Examination Hall Regulations

1. It is an offence against University discipline for a candidate to have in his/her possession in the examination any material relevant to the work being examined unless this has been authorised by the examiners.

2. During an examination, candidates will be permitted to use only such dictionaries, other reference books, computers, calculators and other electronic technology as have been issued or specifically authorised by the examiners.

3. The use of mobile telephones is not permitted and mobile telephones must be switched off during an examination.

4. It is an offence against University discipline for any candidate knowingly
   (a) to make use of unfair means in any University examination,
   (b) to assist a candidate to make use of such unfair means,
   (c) to do anything prejudicial to the good conduct of the examination, or
   (d) to impersonate another candidate or allow another candidate to impersonate him/her.

5. Candidates should be prepared to confirm their identity by displaying their University Card.

6. If an examiner suspects a candidate of cheating, s/he shall impound any prohibited material and shall inform the Examinations Office as soon as possible.

8. Cheating is an extremely serious offence, and any candidate found by the Discipline Committee to have cheated or attempted to cheat in an examination may be deemed to have failed that examination or the entire diet of examinations, or be subject to such penalty as the Discipline Committee considers appropriate.
Appendix II

Extract from the University’s Degree Regulations and Programmes of Study

1. PhD by Research

The Grounds for award for the degree of PhD by research are:

(a) The candidate must have demonstrated by the presentation of a thesis and by performance at an oral examination (unless this is exceptionally waived) that the candidate is capable of pursuing original research in the field of study, relating particular research projects to the general body of knowledge in the field, and presenting the results of the researches in a critical and scholarly way.

(b) The thesis must be an original work making a significant contribution to knowledge in or understanding of the field of study and containing material worthy of publication; show adequate knowledge of the field of study and relevant literature; show the exercise of critical judgement with regard to both the candidate’s work and that of other scholars in the same general field; contain material which presents a unified body of work such as could reasonably be achieved on the basis of three years of postgraduate study and research; be satisfactory in its literary presentation, give full and adequate references and have a coherent structure understandable to a scholar in the same general field with regard to intentions, background, methods and conclusions.

(c) Length of Thesis: Within the Colleges of Humanities and Social Science and Medicine and Veterinary Medicine, the PhD thesis must not exceed 100,000 words. The thesis for the PhD in Fine Art must not exceed 50,000 words. Within the College of Science and Engineering the PhD thesis must not exceed 70,000 words. In exceptional circumstances, on the recommendation of the supervisor, permission may be granted by the Committee to exceed the stated length on the ground that such extension is required for adequate treatment of the thesis topic.

(d) For the award of PhD in Fine Art, in addition to the above, the candidate will be required to submit an exhibit in accordance with the requirements laid down by the Edinburgh College of Art.

The grounds for award of the degree of PhD for Musical Composition in Music are:

(a) The candidate must have demonstrated by the presentation of a portfolio of compositions* and by interview at an oral examination (unless this is exceptionally waived) that the candidate is capable of original composition to a high creative level.

(b) The portfolio of compositions must comprise original work suitable for professional performance and worthy of publication; must show competence in the ancillary technical skills appropriate to the chosen style; must contain material which presents a body of work such as could reasonably be achieved on the basis of three years of postgraduate study; must be satisfactory in its presentation and intelligible to any musician who might have to use it.

(c) The portfolio of compositions should normally include at least one major and extended work. A shorter submission may be accepted in the case of electronic compositions.

(d) The portfolio of compositions should be the result of work done mainly while the candidate is registered for this degree. If a substantial part of the portfolio was completed before registration for the degree, the candidate should indicate this in the declaration and identify the part of the portfolio so completed.

2. MPhil by Research

The Grounds for award of the degree of MPhil by research are:

(a) The candidate must have demonstrated by the presentation of a thesis* and by written and/or oral examination that the candidate has acquired an advanced level of knowledge and understanding in the field of study, is capable of relating knowledge of particular topics to the broader field of study involved and of presenting such knowledge in a critical and scholarly way.
(b) The thesis must be a significant work comprising a satisfactory record of research undertaken by the candidate, or a satisfactory critical survey of knowledge in the approved field of study; show competence in the appropriate method of research and/or an adequate knowledge of the field of study; exhibit independence of approach or presentation; be satisfactory in literary presentation and include adequate references.

(c) Within the Colleges of Humanities and Social Science and Medicine and Veterinary Medicine, the thesis must not exceed 60,000 words. Within the College of Science and Engineering the thesis must not exceed 50,000 words. In exceptional circumstances, on the recommendation of the supervisor, permission may be granted by the Committee to exceed the stated length on the ground that such extension is required for adequate treatment of the thesis topic.

(d) The award of MLitt/MPhil in Fine Art will only be made for the thesis and exhibit in Fine Art where the examiners deem that the thesis and exhibit do not meet the criteria for the award of PhD, but that they are sufficiently close to meeting those criteria for an MLitt in Fine Art to be awarded.

The grounds for award of the degree of MPhil for Musical Composition in the School of Arts, Culture and the Environment are:

(a) The candidate must have demonstrated by the presentation of a portfolio of compositions* and by oral examination that the candidate is capable of original composition to a high level.
(b) The portfolio of compositions must comprise original work suitable for professional performance; must show competence in the ancillary technical skills appropriate to the chosen style; must be satisfactory and intelligible in its presentation.
(c) The portfolio of compositions should include at least one extended work. A shorter submission may be accepted in the case of electronic compositions.

3. PhD by Research Publications

The grounds for the award of PhD (by Research Publications) are:-

(a) The submission of a portfolio of published work judged satisfactory by the examiners and a satisfactory performance at an oral examination.
(b) The submitted portfolio of published research must add up to a substantial and coherent body of work which would have taken a diligent student the equivalent of three years of full-time study to accomplish, which makes a significant contribution to knowledge in or understanding of the candidate’s field of study, and which is of a scholarly standard normally expected of a candidate who submits a PhD dissertation.
(c) The portfolio of published work must consist of either one or two books or at least six refereed journal articles or research papers, which are already in the public domain. The total submission, including the critical review should not normally exceed 100,000 words.
(d) Candidates must either be the sole author of the portfolio of published work or must be able to demonstrate in the critical review of the submitted work that they have made a major contribution to all of the work that has been produced by more than one author.

4. MSc by Research and MTh by Research

The grounds for the award of the general degrees of MSc by Research and MTh by Research are:-

(a) The certified completion of research training plus other designated projects and/or assignments and/or course work, and the completion of a dissertation. The assessed work, including the dissertation, should be equivalent to but not exceeding 30,000 words. The dissertation, which may comprise the total of the assessed material, or a part only, in which case that part must be worth at least 60 points out of the total 180 points required for the award of the degree. Assessments of the various elements may be made separately or together at the end of the programme.
The grounds for the award of a specified MSc by Research and MTh by Research, and the recommended length of the dissertation, will either be laid out in the relevant Degree Programme Tables or will be specified by the relevant School.

(b) The completion any required research training and have demonstrated by the presentation of work specified above that he/she has acquired an advanced level of knowledge and understanding in the field of study and is capable of undertaking independent research. (c) The portfolio of projects or dissertation submitted should comprise either a satisfactory record of research undertaken by the candidate, or a satisfactory critical survey of knowledge in the field of study, or both combined with a satisfactory plan for a more advanced research project; and show competence in the appropriate method of research and an adequate knowledge of the field of study. The work must be satisfactory in its literary presentation and include adequate references.

5. MRes

The grounds for the award of the degree of MRes are as for the MSc by Research and MTh by Research save that the work may be assessed wholly by completion of a dissertation, or wholly by completion of a portfolio of course work, projects and assignments, or by any proportion of these.

6. Taught Professional Doctorates

The grounds for the award of Taught Professional Doctorates are:

(a) The candidate must have demonstrated by the presentation of a thesis and by written and/or oral examination that the candidate has acquired an advanced level of knowledge and understanding in the field of study, is capable of relating knowledge of particular topics to the broader field of study involved and of presenting such knowledge in a critical and scholarly way;

(b) The thesis must be a significant work comprising a satisfactory record of original research undertaken by the candidate, or a satisfactory critical survey of knowledge in the approved field of study; show competence in the appropriate method of research and/or an adequate knowledge of the field of study; exhibit independence of approach or presentation; be satisfactory in literary presentation and include adequate references.

(c) Candidates are also required to take classes and pass examinations during their period of study, as specified in the relevant degree programme entries.
